INDEX GRAECO-LATINUS

CONFECIT

GUILELMUS HERAEUS

Hoc indice qui uti volent, ut recte utantur, utique teneant eum confectum esse omnino ad 'Thesaurum glossarum emendatarum (vol. VI et VII p. 1—438)'. Itaque interpretamenta latina nihil aliud indicant nisi lemmata illius thesauri, ad quae necessario semper recurrendum est utentibus, ut certiora et accuratiora ibi inveniant, sive varias scripturas sive formas derivatas sive criticas dubitationes, quas revolvere huius indicis non erat. Ubi graeca et latina lemmata valdius differunt, id uncinis rotundis postpositis indicatum est hoc modo: *ἀκροστόλιον* forus (-i), ut pluralis 'fori' sub lemmate 'forus' significetur, vel: *ἀγαπητός* bonus (optimus).

Adverbia ab adiectivis seiuncta sunt, adiectiva verbalia a verbis, sed participia cum verbis coniuncta. Verba quae dicuntur contracta primam personam contractam habent ex usu glossarum, velut *ἀγωνιῶ* non *ἀγωνιάω*.

Eins. significat glossam et sola auctoritate Hermeneumatum Einsidlensium niti (cf. vol. VI praef. VI) et suspectae originis esse.

expl. significat latina lemmata thesauri, quibus voces graecae continentur, explicationem sequentem habere, ut: *ἀγκωνίσκος cf.* anconiscos (*expl.* incastratura).

s. interpr. = sine interpretatione.

Asterisco * notata sunt ea verba graeca, quae nisi glossis tradita non videntur, etiam quae corrupta sunt ita, ut fortasse aliquid novi lateat (haec accentu et spiritu carent).

Ceterum vide epilogum huic indici subiectum.

INDEX ANGLOSAXONICO-LATINVS

CONFECIT

GVILELMVS HERAEVS

Hoc indice quotquot anglosaxonica insunt glossariis verba ordine alphabetico eademque flexura formaque, qua tradita sunt sive recte sive perperam, enumerantur addito interpretamento latino, quo ad Thesaurum glossarum emendatarum (vol. VI et VII p. 1—438) legentes revocantur, ita ut, ubicumque lemma latinum Thesauri non plane respondet, in hunc modum indicetur: '**achlocadum** effossis *s. v.* effossa', ut sub lemmate 'effossa' glossa inveniatur. Codicum differentias omnes indicavi secundum editionem, notans codices Epinalensem E, Amplonianum primum A, Leidensem Voss. Q 69 L, Cantabrigensem Collegii Corp. Chr. 144 C. Reliquos codices et fragmenta codicum siglis distinguere supersedi, cum facultas rarior esset varias lectiones enotandi. Quae in editione aut in Thesauro errore omissa erant, retraxi. De ordine alphabetico ę ubique retinui, sed eodem gradu atque e posui. De reliquo periti linguae saxonicae facile naturam atque indolem huius indicis perspicient. Ceterum vide etiam 'Epilogum' in calce huius libri.

EPILOGUS.

Quibuscumque indice graeco uti placebit, eos hoc quoque loco monitos velim id, quod iam supra p. 440 dixi, indicem confectum esse ad lemmata 'Thesauri glossarum emendatarum' (vol. VI et VII p. 1—438) neglecta in universum omni formarum casuum temporum, modorum cet. varietate nec revolutis quaestionibus criticis, ita ut omnia quaecumque utcumque tradita sunt — sive recte sive perperam — aut merae coniecturae debentur, in indicem recepta sint. Quare ne quis in indice inspiciendo acquiescere se posse opinetur: immo omnino necesse est de uno quoque verbo etiam Thesaurum adire, unde demum certiora et accuratiora cognoscere licet. Sed formarum varietas ut tamen respiceretur, hic illic rationes lemmatum latinorum Thesauri aut discrimina utriusque linguae cogebant. Quod ut exemplis illustrem, in hoc indice participia verborum cum verbis coniungere necesse erat, cum in Thesauro latino certis de causis separata a verbis loca haberent (nisi quod adiectiva, quae dicuntur verbalia, in hoc indice separatim posita sunt, velut *φροντιστέα* non invenies s. v. *φροντίζω*, similiter adverbium participii perfecti e. g. *πεφεισμένως* non exstat s. v. *φείδομαι* secundum institutum nostrum, quo adverbia ab adiectivis seiuncta sunt). Praeterea necesse erat passiva et media verborum graecorum ab activis discernere sub eodem lemmate, velut 'ἀναιρῶ caedo, interficio, interimo, macto *cet.*, — *οὖμαι* pereo', unde ne quis concludat passivam graeci verbi formam tantum s. v. 'pereo' inveniri, non etiam sub verbis antecedentibus latinis activae formae (cf. mactari *ἀναιρεθῆναι* s. v. macto). Eadem cautio adhibenda est e. g. s. v. *σαφηνίζω*, ubi separatim posita sunt '*σαφηνίζει* asserit, destinguit', nimirum deficientibus lemmatibus 'assero, destinguo': at etiam sub eis quae antecedunt verbis 'declaro, explano' forma tertiae personae habetur '*σαφηνίζει* declarat, explanat'. Idem valet de nominibus, velut s. v. *τέκνον* (filius, gnatus, natus) etiam pluralis *τέκνα* 'liberi, suboles' notatus est (cf. *τέκνα* nati s. v. natus). Quae omnia a nobis ita instituta esse, ne ambitus indicis eoque totius voluminis septimi nimis increscerent, apparet. Eadem autem de causa quaestiones criticas rursus exponere supersedi, quae iam in Thesauro ipso satis abundeque a Goetzio tractatae essent. Sicubi tamen nova interim invenisse mihi videbar ad explicandas emen-

dandasque glossas aut alii attulerant, inprimis Buecheler, protuli. Ceterum utentium commodis ita providi, ut quam largissime possem eos ab hac ad illam vocem delegarem. Praeterea non ingratum fore confido sermonis graeci studiosis, quod asterisco praeposito insignivimus quaecumque voces in lexicis Stephani editionis novissimae et Sophoclis (Greek lexicon of the Roman and Byzantine periods, New York 1887) aut omnino desunt aut ex solis glossariis notatae sunt. Ita simul sub uno conspectu posita sunt quaecumque nova glossis suppeditantur. Sed cum lexica illa non tam plena sint quam nostrae aetatis scientia postulat, sane non nullae voces asteriscum habent, quae aliunde quoque cognita sunt, ne quis putet nos omnia pro novis venditare voluisse. Velut non ignoro *γῆς* (pro *γῇ*) esse posterioris graecitatis (cf. Hatzidakis, Einleitung in die neugriech. Grammatik, 1892, p. 277), *στίχη* in Edicto Diocletiani exstare (c. 19, 2 etc.) itemque *τύρχη* (c. 15, 47) sim. Deminutiva accepi memor naturae graecitatis inferioris *μολόχιν*, *τυκάνιν* sim., quae vereor ut recte itacistica *μολόχην* etc. explices. Similiter nominativa in *-ις* pro *-η*, ut *ἀγάπις*, *ἀστραπίς*, *περικοπίς*, *διαγραφίς*, *ἐπιγλυφίς*, pro novis posuisse me moneo (cf. Remig. Autissiodor. in artem Donati commentum ed. Fox (1902) p. 27, 12 tichis = *τύχη* al.) Innumerabilia graeca, quae in lemmatibus latinis glossarum insunt, ut potui, indagavi et explicavi, etiam vulgaria et in usum latinum dudum conversa, cum haud semel interpretationes locutioni posterioris Graecitatis lucem afferant. Nec pauca nova insunt, quamquam interdum dubitanter recepi, ubi nil nisi species graeca apparet, velut *ἀκλύς*, *σκόλαξ*, *σπάραγμα*, aut nomen proprium explicari videbatur, ut *καλόκαιρος*. Glossas botanicas, ut potui, in usum indicis converti, qua in re diserte moneo, quaecumque graeca sub lemmatibus latinis herbarum leguntur, sive recte sive falso (nam admodum confusam molem earum glossarum esse scito), in verborum ordinem recepta esse.

Restat, ut grato animo eos commemorem, qui pro virili parte nos in hoc opere adiuverunt, Buechelerum et Goetzium, qui toti indici operam navarunt ita, ut et multa rectius constituta sint et errores typographici deminuti, Stadlerum, qui glossas botanicas revisit. Denique etiam Hans Moeller discipulus noster laborem plagularum purgandarum fideliter suscepit.

Indicem anglosaxonicum praeter Goetzium, qui huic quoque parti operam navare voluit, optime adiuvit Victor Michels Ienensis sua linguae illius peritia, pro quo beneficio gratias hoc quoque loco maximas ago.
